

Keller Williams Listing 1

This exceptionally maintained and desirable 3bed/2bath brick ranch with gorgeous views overlooking Evergreen Park welcomes you home with a well-manicured yard and professional landscaping. A gorgeous, richly stained Therma-tru solid front door impresses and keeps drafts out, while solid core doors throughout the home exemplify the quality of workmanship and care that has been put in over the years. Sunrise windows with a high insulation rating swing in for easy cleaning, while insulated siding helps keep those utility costs down and your home comfortable all year round.

Tile and luxury laminate flooring installed in 2009 complement the rich cherry shaker cabinets in the kitchen. Other features include stainless steel appliances, black granite countertops and backsplash, a large peninsula, elegant under cabinet lighting, and glass door display cabinetry. A formal dining room is a great spot for entertaining. The living room features a massive vaulted ceiling with an equally substantive skylight, along with a wood burning fireplace in the corner.

A sizeable master bedroom with crown molding and an Elfa Shelving closet system includes a master bath with stunning Carrara marble tile floor and shower surround, with a luxury triple showerhead setup for the ultimate way to relax sore muscles after a long day. Two other sizeable bedrooms feature crown molding and generous closet space, and a second full bath includes a black granite countertop vanity with shower/tub combo.

Deep closets in the hallway make great storage for cleaning supplies or linens, and a laundry/utility room with brand new glass-top washer and dryer features upgraded steam settings. Even more storage space in the garage and attic help reduce that household clutter.

Out back, a large patio overlooks a private, fully fenced backyard featuring a personal pond, a vibrant variety of flowers, and fertile gardening space for those with a green thumb. A 30-year roof with architectural shingles was installed in 2011, and the A/C is solar-compatible. To top it all off, you're right across the street from Lakeview Elementary!
